Response to Amendment

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 20 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 20 line 9, the phrase "without detecting a position of the element itself" renders the claim indefinite because it claims what the invention is not rather what it is, a negative limitation.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Art Unit: 3742

Claims 12-20 rejected under 35 U.S.C. 102(e) as being clearly anticipated by Hunter et al.(U.S.Pat.6,381,485). Hunter discloses a registration of human anatomy integrated for electromagnetic localization that shows all the features of the claimed invention.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Melkent et al., and Hunter '038 are cited to show structure and method similar to the claimed invention.

Response to Arguments

Applicant's arguments filed 3-11-2003 have been fully considered but they are not persuasive. With regard to applicant's argument that Hunter does not show a connection please see col.7 lines15-60 and see figs. 10-12..
